I'm as people say full stack mean stack front end back end developer with mobile (hybrid) application building skills. I've started my path with C++, but unfortunately I wasn't able to find suitable work, so I moved to another, more popular branch of development - web. Started with PHP and JavaScript, used frameworks like CodeIgniter, Laravel for PHP and jQuery, AngularJS for JavaScript, after few years of working I started SaaS project with Laravel and Angular JS including mobile app (hybrid with Ionic). All was written by me from scratch. Then I've became a team lead in small start up. During few years I started working with NodeJS and Angular 2/4, after some time I migrated to Ionic Framework 3 on mobile apps. I'm looking for an exiting experience on all of my projects. My strong sides are finding/ fixing bugs and project management including communication with client. I speak fluently in English and Russian. Personally I prefer to work remotely and because of that I'm big fan of Agile development practice.

Experience

- ***2012/06 - 2015/10:* Inscope**

  Started my carear as web developer and evolved to mid level. Worked with

  Backend

    - Laravel
    - CodeIgniter
    - Wordpress
    - MySql

  Frontend

    - JavaScript
    - jQuery
    - AngularJS
    - HTML/HTML5
    - CSS/CSS3
    - Bootstrap

- ***2015/10 - 2017/07:* WebFoundationllc**

  Worked as Senior / Team Lead

  Backend

    - NodeJS(express)
    - PHP (Laravel)
    - REST API building
    - AWS services
    - ElasticSearch
    - MySql
    - MongoDB

  Frontend

    - Less / Scss
    - Angular 2/4
    - AngularJS
    - Ionic framework
    - Material design

- ***2017/09 - now:* FlyCode**

Developer / Consultant

Backend

- NodeJS(express)
- REST API building
- Cryptocurrency (Etherium)
- MongoDB
- MySql

Frontend

- JavaScript
- Angular 4/5
- AngularJS
- Ionic framework
- Material design

Skills

- JavaScript (including ES6)
- Angular 4/5
- NodeJS (express)
- REST API building
- Ionic framework(android and ios)
- AngularJS
- Good eye for design
- PHP (Laravel)
- Config Linux servers
- MySql
- MongoDB
- ElasticSearch
- Sphinx
- SaaS
- Heroku platform
- Amazon AWS
- Cryptocurrency (web3)
- Golang (intermidiate)
- C++ (beginner)
